OPEN SCIENCE HUB
SCICO
MAKER LAB
GREECE

Why would you encourage a peer to take part?

—

Key:
CN: *Chavias Nikolaos (computer science teacher, Livadochori High School, Limnos, Greece)*

CN: Hello. My name is Chavias Nikolaos and I am a computer science teacher. The main reason why we would encourage other schools to involve their students in OSHub workshops is because through the activities that take place, students' active citizenship is strengthened, as they are invited to explore issues that concern the local community and provide solutions with the help of technology. At the same time, the school becomes open to the community, as in order to provide solutions it collaborates with other schools, local stakeholders and universities. Thanks.
